

The Nakba Tour is not only an educational experience but an invitation to take action. There are several quick actions that you can take today to help stop the ongoing Nakba and amplify the voices of millions of dispossessed and displaced Palestinians seeking freedom and return.

1. Contact Congress and tell them to stop US aid to Israel. Tell your representatives to stop U.S. aid to Israel now. Call your representative's office and let them know that you think that U.S. aid should stop going to dispossess and oppress Palestinians, including millions of refugees denied their right to return. Learn how to contact your representative: <https://www.contactingcongress.org/>

2. The continuing Nakba also involves attacks on Palestinian existence, Palestinian narrative and even Palestinian scholarship. Dr. Rabab Abdulhadi, a distinguished scholar at San Francisco State University (SFSU) is facing a groundless federal lawsuit filed by right-wing Zionist organizations as a form of "lawfare" against Palestinian scholarship. Follow the Facebook page for her defense campaign: <https://facebook.com/DefendProfAbdulhadi> or support her legal defense: https://www.launchgood.com/project/professor_rabab_abdulhadis_legal_fund#/

3. Build the boycott of Israel – including academic, cultural, economic and military boycotts. The Israeli state doesn't accomplish its ongoing Nakba alone; the support of complicit governments and corporations is critical. By joining boycott campaigns, people of conscience can provide a material boost to Palestinians' struggle for return and liberation.

4. Donate to keep the Nakba Tour going. This important educational resource is entirely self-funded. Without grants or other funding, grassroots support is critical to make sure voices like Umm Mousa's and Amena's can reach people throughout North America. Keeping this tour going depends on people like you. Donate here: <http://freepalestinemovement.org/donate-2/>
